Subject: Microsoft case

Dear DOJ,

In the past, when some lawsuits were settled with terms "lightly" in favor of Microsoft, they sometimes have continued to thwart the law and continued to commit unacceptable business practices. As a tech coordinator for a school district that uses both Macintosh(R) computers and PC's running Windows(R), I can tell you that the vastly superior user experience for students and consumers is on the Macintosh platform. If Microsoft is allowed to remain a "whole" entity, then they will never stop destroying consumer choice and restricting a fair and balanced computer industry. Please do what you can to see that they are split up into two companies, one designing the operating systems, and the other to design applications that run on ALL viable operating systems. In my opinion, Bill Gates should be removed from any position of power in both companies as it was proven in the anti-trust trial that he was and is the chief catalyst for anti-trust and non-competitive business practices

Sincerely,

Chris

Hamady
